

FAQS

What is the price of beans?

Beans do not have a set price.
Higher TVL more Beans per BNB | Lower TVL less Beans
This creates level playing field so no user can be late
There is NO calculator available to work this out

What will my daily percentage be?

Daily percentage is up to 8%
This depends on eating habits, time of day you re-bake or deposit, TVL fluctuation.
Average is 5-6% if you re-bake 6 and eat 1 weekly

Why are my rewards not growing?

Eating habits effect rewards, you eat to much your daily percentage drops. If you only started with a small deposit it will take time to display on the dApp. Only goes to 3 decimal places. TVL daily increase can cause lower daily percentage

What happens if i always eat?

If you always eat your daily percentage will drop dramatically and will not receive the highest daily returns. This is the anti-whale mechanism that helps so the TVL is not drained.

Is re-baking more often better, 2 or 3 times a day?

Re-baking is the same as compounding. so essentially yes. You will need to pay standard BSC gas fees for every re-bake.

What are 'Beans'

Beans are the miners that are hired with BNB and work to get your rewards. This is just a term we decided to use. Crypto OGs will know 'Beans' as BNB

FAQS

Can I get my initial back?

Baked Beans miner is a locked rewards pool, so no. You get your initial back over time through the my rewards section of the dApp

How come my referalls aren't showing | Where are they?

Your referrals show up in the 'My Rewards' Section of the miner dApp.

Referalls are 12% of the 3% dev fee
1 BNB deposit equals .0036 BNB

What are the fees?

There is 3% dev fee taken upon ALL deposits and withdraw from Baked Beans Miner.

Standard BSC network gas fees are required for EVERY transaction made deposits, withdraws and re-bakes!
Common issue when re-baking is no gas fees!

Do Beans amount decrease when you eat?

No, the 'Beans' amount will not change. If you make a new deposit or re-bake the amount will increase but not when you eat (take rewards).

The 'Beans' are less efficient over time if you eat to much

Is this sustainable?

Yes, as long as there is TVL in the contract then there will always be rewards. The hungry people who eat to much get punished and get lower and lower rewards.
It will last a long time the higher the TVL is

What is the best strategy?

We recommend the tried and tested method as in it is written in the contract.

Re-bake 6 days and eat 1 day a week. It will compound your investment and recieve your initial back in 6-8 weeks

FAQS

What prevents the devs from rugging?

The contract is immutable. Therefore cannot be changed or altered in any way shape or form. It is audited and verified. You can view this on bscscan.com and the audit it is found on the website

How come my referalls aren't showing | Where are they?

Your referrals show up in the 'My Rewards' Section of the miner dApp.
Referalls are 12% of the 3% dev fee
1 BNB deposit equals .036 BNB

Is it to late to invest?

No, the contract is written to provide a optimal entry for any and all users, new or old. This is the reason the beans per BNB amount changes frequently with TVL fluctuation to provide an even playing field for any new user coming to Baked Beans and not giving the first user/s a headstart

Can contract functions be added?

No, the contract is immutable and cannot be changed. The contract works perfectly well as it is. No wallets can be blacklisted, no forcing people to re-bake 6 days and eat 1 day a week. Nothing can be changed

Does it have an anti whale mechanism?

The contract has an in-built anti-whale mechanism. This works as follows; User 1 re-bakes 6:1 gets highest daily percentage in that 24 hour period. User 2 does 5:2 gets a lower percentage. User 3 does 4:3 gets lower percentage again. This happens all the way until the user who eats continually rewards will drop to 0.5% per 24 hour period. This is to prevent 1 user draining the TVL, creating sustainability

What is the minimum deposit?

The minimum new deposit into the miner .01 BNB. If there are rewards in the "My Rewards" section and you make a new deposit both the new deposit and rewards are transferred into Beans

www.bakedbeansproject.com

FAQS

What is minimum re-bake?

The minimum re-bake is .01 BNB.
You will always be charged standard BSC BEP20 gas fees for every interaction with the contract

How are the miner and token connected?

They are separate completely except for the fact a 5% of buy/sell taxes from the \$BCT token being deposited into the miner to add TVL. This wallet will be publicly accessible. Strategic deposits will be made to help the Baked Beans Miner TVL rise.

****DISCLAIMER****

We DO NOT guarantee 8% a day it is up to 8%
Baked Beans Miner is illegal in certain countries please consider this when investing
Do not invest more than you can afford to lose

GLOSSARY

dApp: Digital applications that run on a blockchain network of computers instead of relying on a single computer. Because dApps are decentralized, they are free from the control and interference of a single authority

Contract: Cryptocurrencies definition is; smart contracts that execute functions on the blockchain.

Beans: The term for Baked Beans Smart contract miners, acquired by depositing BNB into the DeFi protocol. Beans are what earn you your accumulated rewards

TVL: Total value locked (TVL) is the overall value of crypto assets deposited in a decentralized finance (DeFi) protocol - or in DeFi protocols generally

Audit: An audit is a process where developers inspect the underlying code and/or algorithm that compose systems and applications.

Litepaper: Litepapers can be considered a teaser version of a whitepaper. It is a shortened more concise version of a whitepaper and serves to pique the interest of curious users and investors.

Immutable: Immutability is the core defining feature of blockchain. The word 'immutable' means that data cannot be changed or modified by anyone after its creation.

Re-bake: Re-baking is the ability of your initial investment to generate earnings, which are reinvested with the goal of generating more BNB rewards
